ODOT Transportation Building, Room 122

Capitol Mall, Salem, OR

June 1, 2010

1:00 – 4:00

Introductions

Approval of meeting minutes from April 29, 2010

Identification of additional agenda items

Review of Membership

Vision Statement for the Access Management Discussion

The four areas are:

- SB 1024 requires ODOT to develop a separate rule for low volume state highways within Oregon. ODOT will bring back ideas on this matter to the Access Management Committee. When will this occur and what is the role of the committee?
- Medians and physical barriers. An agreement is needed on when they can be required and how to get local buy in. Tindall noted that they should only be required when other mitigation will not work.
- Reasonable access. The concept is in the rule now, but is not interpreted entirely consistently. The concept needs more definition.
- Focus on the balance between safety, flow of traffic while recognizing the need to support economic development.

Discussion: Identification of areas of concern in the existing Oregon Administrative Rules related to access management and consider potential modifications to the rules.

Update on the status and propose timeline for a temporary administrative rule to satisfy SB 1024
